The above web application has undergone through IT (Cyber) Security Audit by our organization through provided Testing & Production URL as per guidelines, advisories, white papers and vulnerability notes issued by Indian Computer Emergency Response Team (CERT-In). We also tested the web application against various API Security Standards like Open Web Application Security Project (OWASP) API Security Top 10 2023, Common Weakness Enumeration (CWE), Common Vulnerabilities and Exposures (CVE) etc.

The audit was conducted on the given staging environment, not in production environmen

Conclusion: On the basis of audit outcomes, it is certified that the above application is safe from any known vulnerabilities as on date.

The Certificate shall be deemed invalid if the underlying IT infrastructure of the web application gets modified after compliance audit.

Other Recommendations:

1. Web Server Security and the OS hardening need to be in place for the production server.
2. Web Application should comply with Guidelines for Secure Application Design, Development, Implementation & Operations issued by CERT-In.
3. Organization must comply with the Directions issued by CERT-In (Notification No. 20(3)/2022-CERT-In) dated 28 April 2022 relating to information security practices, procedure, prevention, response and reporting of cyber incidents for Safe & Trusted Internet.
4. The Developer Team must follow the Technical Guidelines on Software Bill of Materials (SBOM) issued by CERT-In dated 03.10.2024.
